

Andre's Infloor Heating
Andre Gauthier

We had a SuperHot Mini Gas Boiler in our home which heated our sun room. It was on its last legs. The SuperHot distributor referred us to Andre. He came to the house and immediately diagnosed a major leak in the heat exchanger of our rusted old boiler. The boiler was too far gone and rather than repair it, he recommended we replace it since the life expectancy of the boiler would be short and the repairs costly.

Andre removed the old broken down boiler along with the old wires and pipes. He then installed the new boiler and upgraded all of the wiring and water lines which were installed in a very precise manner. He freed up space in the furnace

room by mounting the boiler and piping close to the wall in a clean and efficient manner.

Andre flushed out the old lines beneath the sunroom floor which in our 18 years in the house, had never been done before. With a new boiler and clean water lines, we noted a more consistent heat throughout the sunroom, where before the only heat we really got in winter was in front of our furniture. Nothing at the patio doors or the perimeter of the walls.

With a more efficient heating system we noted regular savings in our monthly billings.

We would highly recommend Andre for any new installation, service or repair. He is professional, fair and very good at the work he does.
